

# The Role of Electricity in the Morphology of the Universe

## Centre for Creative Collaboration

16 Acton Street, Kings Cross, London WC1X 9NG  
[www.creativecollaboration.org.uk](http://www.creativecollaboration.org.uk)

An event as part of DériveLab Project 2  
[www.a2arts.co.uk/derivelab](http://www.a2arts.co.uk/derivelab)

Friday 23rd July 2010. assemble 5:45pm for 6 - 7pm

Artist Paul Malone takes you on a unique and controversial tour of the Universe.

Originally devised to introduce artists and designers to the wide range of forms inherent in plasma structures, this talk follows contemporary speculations into the role that electro-dynamics play in forming the objects that we see in modern astronomy.

Otherwise known as 'Electric Universe' theory or 'Plasma Cosmology', it draws from publications by members of the IEEE and others and traces the history of the study of electricity in Space from Birkeland through Langmuir and Jeugens to today's advocates.
