

The Role of Electricity in the Morphology of the Universe

Bankside Community Space.

18 Great Guildford Street, London SE1 (Tate Modern end)

Tuesday 9th March 2010. 5:45pm for 6 - 7pm

Free to the public : Tea and biscuits

Artist Paul Malone takes you on a unique and controversial tour of the Universe.

Originally devised to introduce artists and designers to the wide range of forms inherent in plasma structures, this talk follows contemporary speculations into the role that electro-dynamics play in forming the objects that we see in modern astronomy.

Otherwise known as 'Electric Universe' theory or 'Plasma Cosmology', it draws from publications by members of the IEEE and others and traces the history of the study of electricity in Space from Birkeland through Langmuir and Jeugens to today's advocates.
